

2021 Title IX Regulations: Required Posting

On May 19, 2020, the U.S. Department of Education published its new Title IX regulations covering sexual harassment, sex discrimination and sexual assault in education programs and activities. The new regulations take effect on August 14, 2020 — in time for the start of the 2020-21 school term.

Every school district reviewed and modified various policies and procedures in connection with the implementation of the new Title IX regulations. There is also a significant training and staff development component. The CSD administrative team completed the required training components on the various roles for Title IX investigations on October 29, 2020. All staff are required to take a Title IX course through our online professional development platform called SafeSchools. The Cedarburg School District School Board approved a new Title IX Board Policy, entitled [Non-discrimination on the Basis of Sex in Education Programs or Activities #2266](#).
