The materials available for preview includes: Glencoe *Teen Health 1* along with the *Adolescence: Growing and Changing* supplement and 2 DVDs *Puberty: The Great Adventure for Guys and Girls* and *Flirting or Hurting? When is it Okay? When is it Harassment?*

LEARNING TARGETS FOR PHYSICAL GROWTH

- Explain the importance of cleanliness during puberty.
- Identify the female physical changes during puberty: rapid growth; acne; increased perspiration; underarm and pubic hair; increased level of female hormones; development of breasts; formation of mature eggs (ova); beginning of the menstrual cycle; increase in body fat; and widening of the hips.
- Identify the male physical changes during puberty: rapid growth; acne; increased perspiration; increased level of male hormones; facial, pubic and body hair; broadening of shoulders; deeper voice; increased muscle development; enlargement of the external genitals; production of sperm cells.
- Identify the male and female reproductive organs and their functions relating to puberty.
- Identify the age range in which puberty occurs.
- Learn how puberty begins.
- Explain the importance of cleanliness during puberty.
- Compare and contrast the changes that males and females go through during puberty.
- Identify the male and female reproductive organs and their functions relating to puberty.

NOTE: *Boys and girls will be separated for a portion of this instruction.*

LEARNING TARGETS FOR PERSONAL SAFETY

- Identify the difference between sexual harassment and flirting.
- Explain the steps to take if you are sexually harassed.
- Describe what to do if you see someone being sexually harassed.
- Identify your own personal boundaries in relation to flirting.
